TestBank Laptop and Equipment Policy

Version 1.4 | Owner: IT Asset Management | Effective: 1 July 2025

1. Standard equipment

Every employee receives one standard company laptop. Office staff receive a 14-inch business laptop; engineering and design staff may request a high-performance model with manager approval. All laptops are configured by IT with encryption, antivirus and automatic updates. Do not disable these protections.

2. Laptop replacement

Laptops are replaced every 4 years. IT will contact you about 1 month before your replacement date. A laptop may be replaced earlier if it is damaged or no longer works properly. Raise a Hardware Request on the IT Portal. Before handing in an old laptop, make sure all your files are saved to OneDrive. IT erases all data from returned laptops.

3. Lost or stolen equipment

Report a lost or stolen laptop or phone to the IT Helpdesk (extension 4357) as soon as possible and in any case within 24 hours. IT will lock and erase the device remotely. If the device was stolen, you must also file a police report and send the report number to IT. The first replacement is free of charge. Repeated losses caused by carelessness may be charged to your department.

4. Accessories for home and office

Employees may order accessories such as an external monitor, keyboard, mouse or headset through the IT Portal. The accessory budget is up to JPY 30,000 per employee every 3 years. Items above this amount need manager approval.

5. Personal use

Limited personal use of company equipment (for example, checking the news during a break) is allowed, as long as it does not affect your work and follows the IT Security Policy. Do not install games, personal software or browser extensions. All software must be requested through the IT Portal.

6. Leaving the company

When you leave TestBank, you must return your laptop, phone, security badge and all accessories within 5 working days of your last day. Equipment that is not returned will be charged at its current value.
